DBE Goals Remain

The current DBE goal of 12% on Federal Transit Administration (FTA) assisted projects will remain the same during the year 2000.

The focus will cover DBE goals in more detail in the April issue.

make the short list is because they lose points by not answering questions completely. "Your qualifications are important," Kohn said.

Pablo Lambinico explained King County's loan program available to companies in King County outside the Seattle City limits. Loans range from \$5-\$50,000 and are available to companies that can't qualify for conventional loans. Although these loans require collateral, the criteria is not as stringent as at conventional banks. A formal business plan is not required, but makes the process easier. One requirement, however, is that for every \$35,000 borrowed, the company must create one full-time job.

Ruth Ann Halford explained the lending program at Community Capital Development and emphasized how every loan qualifies the

lender for unlimited technical assistance. (See the October 1999 issue of *The Focus* for an overview).

Louis Cooper, Jr., of the Northwest Minority Supplier Development Council profiled the Council's role as a "third party certifier," matching minority contractors with public and private contracting opportunities. See page 1 for more information about the Council.

Lester Roddy of the Seattle Minority Business Development Center provided an overview of the management and technical assistance available for minorities. Services include help with business plans, financial packages, procurement searches and marketing.

The half-day workshop ended with a slide presentation on the "Boost" Program by Phyllis Alleyne, Manager of the County's Business Develop-

ment and Contract Compliance Division. She outlined how leaders from the City, County, University of Washington, Seattle School District, Port of Seattle and the community responded to the passage of I-200 with a contracting equity framework that encompasses several strategies and emphasizes training and outreach. See page 6 for additional information on how the Boost Program will promote the use of small, economically disadvantaged businesses.

Alleyne ended her presentation with, "'Boost' is not an acronym. It's a very active verb."

INFOTREK information packets are still available. Call the Business Development and Contract Compliance Division at (206) 684-1330 to request one.
